

**Third Grade Math Standard**

*Measures the length of an object in inches and half inches.*

Directions:

1. Find Math Class By RIT-Measurement
2. Look at Compacted DesCartes. At what RIT band are students prepared to handle this standard?
3. DesCartes allows you to divide the students into three groups for differentiated instruction. What RIT ranges are working below standard? Record those ranges and the students' names.
4. Find the RIT range at which the students are ready to attack this standard. Record the ranges and the students' names.
5. Are there students who are ready to be accelerated? Could you form a third group based on your Class By RIT and Compacted DesCartes?

| <b>RIT Range</b> | <b>Students</b> | <b>Skill</b> |
|------------------|-----------------|--------------|
|                  |                 |              |
|                  |                 |              |
|                  |                 |              |
